

Luca Hostettler

Engineering Leader · Platforms & Frameworks

Zürich, Switzerland luca@hostettler.io github.com/lucahost linkedin.com/in/lucahostettler hostettler.io

Engineering leader in Zürich, building the internal frameworks and APIs other product teams build on at Digitec Galaxus, Switzerland’s largest online retailer — shaped around what each team actually needs to ship. I care about scalable architecture, pragmatic delivery, and lifting the people around me.

EXPERIENCE

Digitec Galaxus AG Feb 2023 — Present

Switzerland’s largest online retailer · Zürich

Teamleader Software Engineering Jun 2025 — Present

Built and lead a team building the core frameworks and internal APIs other engineering teams depend on, and drive adoption of AI tooling across the engineering organisation. Own hiring, mentoring and technical direction.

Senior Software Engineer Aug 2024 — Jun 2025

Product-responsible for the logistics warehouse-transfer domain — enabling in-store pickup and orchestrating truck departures within tight delivery windows. Designed resilient, scalable services integrated with core ERP processes.

Software Engineer Feb 2023 — Aug 2024

Joined the new last-mile team “Firefly” and helped build “Flash Delivery”, the same-day delivery option now reaching 55% of Swiss customers.

ISE AG Informatik Solutions Dec 2014 — Dec 2022

IT solutions & service provider · Einsiedeln

Software Engineer (Full-stack) 8 years

Designed, built and maintained customer-facing and internal applications across the full stack. Built ISE IntranetAdmin — a rule-based user & group synchronisation product, originally my HF diploma project — now shipped to 20+ schools and keeping 50,000+ users in sync across school management software and Entra ID or on-prem AD. Also led delivery of a multi-tenant ticketing platform for education-sector clients with CRM integration, and mentored apprentices.

[ise-intranetadmin](#) ↗

Visary IN PARALLEL Apr 2018 — Jul 2019

Donation-app startup · Zürich - Remote

Java Backend Engineer 1 yr 3 mos

Helped build the Spring Boot / Java backend for a Swiss startup modernising charitable giving — an app to make donating quick, safe and simple.

ABB Aug 2012 — Dec 2014

Global technology & engineering group · Zürich HQ

Application Developer 2.5 years

Built and maintained “ABB Inside”, the company intranet, and supported the global trainee programme.

Swiss Armed Forces IN PARALLEL Mar 2016 — Jul 2026

Concurrent leadership commitment · Switzerland

Specialist Officer (Captain), Signals Mar 2016 — Jul 2026

Deputy operations chief (S3) for a battalion. Planned and led operations involving 300+ personnel, coordinated the staff cell and ran brigade-level exercises.
